

2018

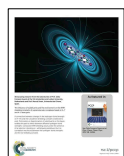

T. Hamlin, M. Swart, and F.M. Bickelhaupt
“Nucleophilic Substitution (S_N2): Dependence on Nucleophile, Leaving Group, Central Atom, Substituents, and Solvent”
ChemPhysChem **2018**, *19*, 1315-1330

2017

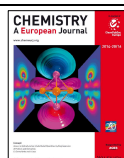

I. Monte Pérez, X. Engelmann, Y-M. Lee, M. Yoo, K. Elumalai, E.R. Farquhar, E. Bill, J. England, W. Nam, M. Swart and K. Ray
“A Highly Reactive Oxoiron(IV) Complex Supported by a Bioinspired N_3O Macrocyclic Ligand”
Angew. Chem. Int. Ed. **2017**, *56*, 14384-14388

A.C. Castro, M. Swart and C. Fonseca Guerra
“Influence of Substituents and Environment on NMR Shielding Constants of Supramolecular Complexes based on A-T and A-U Base Pairs”
Phys. Chem. Chem. Phys. **2017**, *19*, 13496-13502 [back-cover]

2014

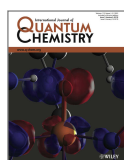

A.C. Castro, E. Osorio, J.L. Cabellos, E. Cerpa, E. Matito, M. Solà, M. Swart and G. Merino
“Exploring the Potential Energy Surface of E_2P_4 clusters ($E =$ Group 13 Element): The quest of inverse carbon-free sandwiches”
Chem. Eur. J. **2014**, *20*, 4583-4590 [cover]

2013

M. Garcia-Borràs, S. Osuna, M. Swart, J.M. Luis and M. Solà
“Maximum aromaticity as guiding principle for the most suitable hosting cages in endohedral metallofullerenes”
Angew. Chem. Int. Ed. **2013**, *125*, 9445-9448 [back-cover]

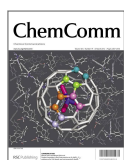

M. Swart
“Spin states of (bio)inorganic systems: successes and pitfalls”
Int. J. Quant. Chem. **2013**, *113*, 2-7 [cover]

2012

S. Osuna, R. Valencia, A. Rodríguez-Forteza, M. Swart, M. Solà and J.M. Poblet
“Full Exploration of the Diels-Alder Cycloaddition on Metallofullerenes $M_3N@C_{80}$ ($M = Sc, Lu, Gd$): D_{5h} vs I_h Isomer, and Influence of the Metal Cluster”
Chem. Eur. J. **2012**, *18*, 8944-8956 (VIP article) [cover]

S. Osuna, A. Rodríguez-Forteza, J.M. Poblet, M. Solà and M. Swart
“Product Formation in the Prato Reaction on $Sc_3N@D_{5h}-C_{80}$: Preference for [5,6]-Bonds, and not Pyracylenic Bonds”
Chem. Commun. **2012**, *48*, 2486-2488 [cover]

2011

S. Osuna, M. Swart and M. Solà
“The reactivity of endohedral fullerenes. What can be learnt from computational studies?”
Phys. Chem. Chem. Phys. **2011**, *13*, 3585-3603 [cover]
