

2020

- P. Vermeeren, T. Hansen, P. Jansen, M. Swart, T.A. Hamlin, and F.M. Bickelhaupt  
“A Unified Framework for Understanding Nucleophilicity and Protophilicity in the S<sub>N</sub>2/E2 Competition”  
*Chem. Eur. J.* **2020**, *26*, 15538-15548 [cover]

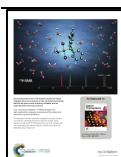

- A.C. Castro, A. Romero-Rivera, S. Osuna, K.N. Houk, and M. Swart  
“Computational NMR spectra of o-benzyne and stable guests and their hemicarceplexes”  
*Chem. Eur. J.* **2020**, *26*, 2626-2634 [cover]

- F. Vlahovic, M. Gruden, S. Stepanovic, and M. Swart  
“Density functional approximations for consistent spin and oxidation states of oxoiron complexes”  
*Int. J. Quant. Chem.* **2020**, *120*, e26121 [cover]

2019

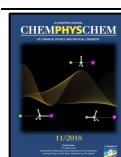

- A.C. Castro, H. Fliegl, M. Cascella, T. Helgaker, M. Repisky, S. Komorovsky, M.A. Medrano, A. Gomez Quiroga, and M. Swart  
“Four-Component Relativistic 31P NMR Calculations for trans Platinum(II) Complexes: Importance of the Solvent and Dynamics in Spectral Simulations”  
*Dalton Trans.* **2019**, *48*, 8076-8083 [back-cover]

- S. Stepanovic, M. Zlatar, M. Swart and M. Gruden  
“The irony of manganocene - an interplay between the Jahn-Teller effect and close lying electronic and spin states”  
*J. Chem. Inf. Model.* **2019**, *59*, 1806-1810 [cover]

2018

- T. Hamlin, M. Swart, and F.M. Bickelhaupt  
“Nucleophilic Substitution (S<sub>N</sub>2): Dependence on Nucleophile, Leaving Group, Central Atom, Substituents, and Solvent”  
*ChemPhysChem* **2018**, *19*, 1315-1330 [cover]

2017

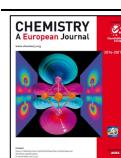

- I. Monte Pérez, X. Engelmann, Y-M. Lee, M. Yoo, K. Elumalai, E.R. Farquhar, E. Bill, J. England, W. Nam, M. Swart and K. Ray  
“A Highly Reactive Oxoiron(IV) Complex Supported by a Bioinspired N<sub>3</sub>O Macroyclic Ligand”  
*Angew. Chem. Int. Ed.* **2017**, *56*, 14384-14388 [frontispiece]

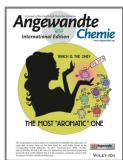

- A.C Castro, M. Swart and C. Fonseca Guerra  
“Influence of Substituents and Environment on NMR Shielding Constants of Supramolecular Complexes based on A-T and A-U Base Pairs”  
*Phys. Chem. Chem. Phys.* **2017**, *19*, 13496-13502 [back-cover]

2014

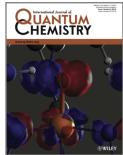

- A.C. Castro, E. Osorio, J.L. Cabellos, E. Cerpa, E. Matito, M. Solà, M. Swart and G. Merino  
“Exploring the Potential Energy Surface of E<sub>2</sub>P<sub>4</sub> clusters (E = Group 13 Element): The quest of inverse carbon-free sandwiches”  
*Chem. Eur. J.* **2014**, *20*, 4583-4590 [cover]

2013

- M. Garcia-Borràs, S. Osuna, M. Swart, J.M. Luis and M. Solà  
“Maximum aromaticity as guiding principle for the most suitable hosting cages in endohedral metallofullerenes”  
*Angew. Chem. Int. Ed.* **2013**, *125*, 9445-9448 [back-cover]

- M. Swart  
“Spin states of (bio)inorganic systems: successes and pitfalls”  
*Int. J. Quant. Chem.* **2013**, *113*, 2-7 [cover]

2012

- S. Osuna, R. Valencia, A. Rodríguez-Fortea, M. Swart, M. Solà and J.M. Poblet  
“Full Exploration of the Diels-Alder Cycloaddition on Metallofullerenes  $M_3N@C_{80}$  ( $M = Sc, Lu, Gd$ ):  $D_{5h}$  vs  $I_h$  Isomer, and Influence of the Metal Cluster”  
*Chem. Eur. J.* **2012**, *18*, 8944-8956 (VIP article) [cover]

- S. Osuna, A. Rodríguez-Fortea, J.M. Poblet, M. Solà and M. Swart  
“Product Formation in the Prato Reaction on  $Sc_3N@D_{5h}-C_{80}$ : Preference for [5,6]-Bonds, and not Pyracylenic Bonds”  
*Chem. Commun.* **2012**, *48*, 2486-2488 [cover]

2011

- S. Osuna, M. Swart and M. Solà  
“The reactivity of endohedral fullerenes. What can be learnt from computational studies?”  
*Phys. Chem. Chem. Phys.* **2011**, *13*, 3585-3603 [cover]
